

Advanced Professional PDF Viewer

Enterprise-Grade Cross-Platform Document Experience

Welcome to ReadNext, an advanced PDF viewer built with Flutter and PDFium. This document serves as both a demonstration file and a functional test suite for rendering, text extraction, search queries, digital annotations, and form handling.

1. Architecture Overview & Search Targets

The system architecture decouples the rendering engine from the presentation layer through an IPdfEngine interface. Users can search for terms like invoice, performance, architecture, encryption, or security across all pages.

Component	Technology	Purpose
UI Presentation	Flutter Material 3	Adaptive responsive interface
State Management	Riverpod Providers	Reactive decoupled state
Rendering Engine	Native PDFium (pdfx)	Sub-pixel vector rasterization
Local Persistence	SQLite Database	Recent files, bookmarks, annotations

Invoice Summary Sample Table

This section demonstrates invoice processing and text extraction validation. Invoice #INV-2026-90412 is cleared for payment.

Invoice Reference: INV-2026-90412Subtotal: \$4,850.00 | Tax: \$388.00 | Total: \$5,238.00

2. Annotation and Markup Capabilities

ReadNext provides a full-featured annotation suite that lets users collaborate and review documents seamlessly. The following annotation types are supported with undo and redo:

- **Text Highlight:** Mark critical phrases with customizable colors (Yellow, Green, Blue, Pink, Orange).
- **Underline & Strikethrough:** Stylistic typographic markups for review revisions.
- **Text Boxes:** Insert custom typography anywhere on the document with dynamic sizing.
- **Freehand Ink:** Draw diagrams, sketch ideas, or underline freeform with varying stroke widths.
- **Geometric Shapes:** Rectangles, Circles, Ovals, Lines, and Directional Arrows.
- **Sticky Notes:** Add collapsible comment threads with timestamps and author signatures.
- **Digital Signature:** Sign contracts directly via touch or mouse and place the stamp.
- **Status Stamps:** Insert standard business stamps like APPROVED, DRAFT, or CONFIDENTIAL.

EXECUTIVE SUMMARY & KEY TAKEAWAYS

All annotations are non-destructive and stored independently in the local SQLite database. When exporting or saving, ReadNext flattens or serializes the vector markup into the exported PDF format.

3. Verification & Form Acceptance

This section tests interactive form widgets, checkmarks, and sign-off procedures. Fill in the fields below or place your digital signature stamp directly over the signature box.

DOCUMENT SIGN-OFF FORM
